What's New in the Photo Combine?

Manage images captured with multiple cameras. Photo Combine is a program that lets you easily manage your images based on the embedded date and time information and the camera used to take them. It lets you change the file name of your images, and lets you manage the photos in different folders. This makes it possible to keep your images organized. Want to keep your photos organized in folders? Photo Combine can help you with that. Select the folder you want to operate on, give it a name and then click on "Add files". It is suggested to assign a different folder to each camera, because the files tend to be very similar, thus making it difficult to tell apart which photo belongs to which camera. Select the images you want to edit and click on the button to rename. Add an item to your list and press the button to rename a new file, or type in the new name to rename multiple files in one click. Once you are done, simply delete the original files from the list to avoid any confusion. If you want to export your files with the changed names, you can do it by selecting the items in the list and pressing the button "Export files". Q: CSS not loading when using SCSS I'm using Rails 3.1.1. On one page I'm using the :erb layout with :sass. The page I'm trying to style is working perfectly fine in the browser but the CSS is being loaded, but the style is not being applied. The CSS loads properly in the layout but is only applied on the outer html tag. Here is the error I'm getting in the asset log: Started GET "/assets/css/app.css?body=1" for 127.0.0.1 at 2012-04-25 19:50:51 -0700 ActionController::RoutingError (No route matches [GET] "/assets/css/app.css"): actionpack (3.1.1) lib/action_dispatch/middleware/debug_exceptions.rb:21:in `call' actionpack (3.1.1) lib/action_dispatch/middleware/show_ex
